Item 177b

Scarborough and Ryedale
Clinical Commissioning Group

# SERIOUS INCIDENT, INCIDENT & CONCERNS POLICY

## March 2018

**Authorship: Sue Peckitt Associate Director of Nursing, Quality and Performance NHS Scarborough and Ryedale CCG**

**Committee Approved: Quality & Performance Committee**

**Approved Date: March 2018**

**Review Date: March 2019**

**Equality Impact Assessment: Completed-Screening**

**Sustainability Impact Assessment: Completed Target**

**Audience: All staff, members, seconded staff, agency**

**and contracted staff working within the organisation.**

**Service Users**

**Members of the Public**

**Policy Reference No: SRCCG P106**

**Version No: 2.0**

**The on-line version is the only version that is maintained. Any printed copies should, therefore, be viewed as 'uncontrolled' and as such may not necessarily contain the latest updates and amendments.**

## POLICY AMENDMENTS

Amendments to the Policy will be issued from time to time. A new amendment history will be issued with each change.

| New Version Number | Issued by | Nature of Amendment | Approved by & Date | Date on Intranet |
|---|---|---|---|---|
| 1.0 | SR CCG | Review of Original Policy | Quality and Performance Committee June 2014 | |
| 1.1 | YHCS | Updates from new NHS England national Serious Incident framework | Quality and Performance Committee June 2015 | 24/07/2015 |
| 2.0 | SR CCG | Review and update including changes to the SI review process and to the incident reporting system | Quality and Performance Committee March 2018 | |

# 1 INTRODUCTION

NHS Scarborough & Ryedale Clinical Commissioning Group (NHS SR CCG) is committed to providing the best possible service to its patients, clients and staff. NHS SR CCG recognises that, on occasions, serious incidents (SIs) or near misses will occur and that it is important to identify causes and to ensure that lessons are learnt to prevent recurrence.

Learning from Serious Incidents is an important function of NHS SR CCGs commitment to the safety of its patients, staff and the general public. Modern healthcare is a complex and at times high risk activity where serious incidents or near misses may occur. Promoting patient safety by proactively reducing the risk of error and learning from patient safety incidents is a key priority for the NHS, supported by guidance from NHS England.

NHS SR CCG has a responsibility to receive information on Serious Incidents from NHS organisations within its commissioned services as well as oversight on services affecting patients who are treated out of area. This is in order to assure themselves of the quality of services they have commissioned, and support holding providers to account for their responses and action relating to serious incidents. NHS SR CCG quality assures the robustness of providers' serious incident investigations and action plan implementation. This approach both identifies learning opportunities for improving patient safety and ensures that NHS organisations have robust arrangements in place to identify and investigate SIs to prevent recurrence.

NHS SR CCG also has a responsibility to report and investigate incidents which occur within its own organisation. It also needs to ensure Governing Body is aware of Serious Incidents which occur within the CCG and that action plans are monitored by the Quality and Performance Committee. Learning will be disseminated throughout the CCG. NHS SR CCG is supported in its responsibility by The Serious Incident Team – this team is shared between a number of CCGs, and is hosted by VoY CCG.

NHS SR CCG will be informed of SIs in line with the NHS Serious Incident National Framework (March 2015) that have occurred within any of its commissioned services listed below:

- York Teaching Hospitals NHS Foundation Trust
- Tees Esk and Wear Valleys NHS Foundation Trust
- Yorkshire Ambulance Service
- Independent and Private Providers, commissioned to provide NHS services for the CCGs population, including NHS commissioned placements and service provision in care homes.
- Any other provider of NHS commissioned services affecting the patient population of NHS SR CCG

- SI in services that fall under NHS SR CCG's responsibility under the co- commissioning agenda

This policy sets out the requirements in relation of how to respond to a Serious Incident and provides the tool for investigation. This policy sets out the arrangements to be followed by commissioned services and the CCG, to:

- Promptly and fully report serious incidents
- Effectively manage serious incidents so as to minimise harm and damage.
- Thoroughly and systematically investigate and analyse serious incidents
- Identify learning from serious incidents and share that learning as appropriate
- Take actions and put in place measure to minimise the risk of recurrence
- Report to the NHS SR CCG Quality and Performance Committee /Governing Body and NHS England as required

NHS SR CCGs will work closely with the NHS England, the Department of Health and other organisations to manage serious incidents, minimise risk and in so doing help prevent recurrence across the NHS.

The policy also outlines management of Incidents and Raising Concerns, which are of a less serious nature, but require consideration, potentially investigating and action plans developing to promote a culture of safety in NHS commissioned services.

## 2 ENGAGEMENT

This policy has been developed by Lead Nurses, GPs and clinical and managerial staff in NHS SR CCG, The National Framework for Serious Incidents (2015) on which this policy is based, is available to all hospital, ambulance and community providers.

## 3 IMPACT ANALYSES

### 3.1 Equality

In developing this policy, an analysis of the impact on Equality has been undertaken. As a result of performing the analysis, the policy, project or function does not appear to have any adverse effects on people who share Protected Characteristics and no further actions are recommended at this stage.

NHS SR CCG promotes a culture of Equality and Diversity within its organisation and actively monitors themes arising from incidents for any potential discriminatory activity. See Appendix 4.

### 3.2 Sustainability

The Sustainability Impact Assessment identifies two positive impacts in relation to this policy or the CCG's sustainability themes. These relate to teleconferencing and electronic documentation and meeting management. See Appendix 5.

### 3.3 Bribery Act 2010

There are the following requirements to the provisions of the Bribery Act 2010 within this policy. See Appendix 6

**"Never Event" Serious Incidents**

Never Events are clearly defined in the Revised Never Events Policy and Framework (2018) and NHS providers are required to declare these on Strategic Executive Information System (STEIS).

The number of Serious Incidents, including Never Events is reported to the CCG on a monthly basis.

**Organisational Integrity**
Organisations undertaking NHS services are required to declare Serious Incidents and Incidents. Organisations also investigate Serious Incidents and Incidents using internal investigators.

These requirements present a very low level of risk to the CCG in relation to potential bribery.

## 4 SCOPE

This policy and associated tools for investigation is for use by NHS SR CCG employees, all commissioned services and the Serious Incident Team.

For the purpose of this policy an NHS patient is defined as a person receiving care or treatment under the NHS Act 1977, and described in Serious Incident Framework (2015) as "patient in receipt of NHS-funded care".

The responsibilities of this document apply to NHS SR CCG, all commissioned services and the Serious Incident team who must make themselves aware of their responsibilities in this document as part of their duties to report incidents. An SI can be declared in relation to any member of staff, patient or member of the public who comes into contact with any service commissioned or provided by the NHS SR CCG.

## 5 POLICY PURPOSE & AIMS

The purpose of the Policy is to provide NHS SR CCG, all commissioned services and the Serious Incident Team with a working procedure for managing SIs to improve patient and staff safety.

The objective of this policy is to provide:

- A written description of the procedure
- Areas of responsibility

- Accountability
- Internal and external communication guidance
- Serious Incident classification
- Methods for investigation processes
- Learning from incidents

## 6 DEFINITIONS

SI – Serious Incident
Serious Incidents include acts or omissions in care that result in; unexpected or avoidable death, unexpected or avoidable injury resulting in serious harm - including
those where the injury required treatment to prevent death or serious harm, actual or alleged abuse, where healthcare did not take appropriate action or intervention to safeguard against such abuse occurring.

Never Events are serious incidents that are wholly preventable as guidance or safety recommendations that provide strong systemic protective barriers are available at a national level and should have been implemented by all healthcare providers. Each Never Event type has the potential to cause serious patient harm or death. However, serious harm or death is not required to have happened as a result of a specific incident occurrence for that incident to be categorised as a Never Event.

Incident – An incident is any event or circumstance that could or did lead to unintended or unexpected harm, loss or damage to one or more patients, members
of staff, visitors, other persons or property, but does not constitute a Serious Incident.

Concern – Occurrence which gives cause for concern by patient, member of public, health or other care worker, which does not constitute an incident, but where collectively, can contribute to or form a body of evidence for commissioners to require actions and promote learning.

## 7 ROLES / RESPONSIBILITIES / DUTIES

NHS SR CCG has a responsibility to ensure there is a robust performance management process in place that meets NHS England requirements as well as provides clear guidance on the identification, investigation and feedback of an SI.
Part of this responsibility is to ensure commissioned services report SIs electronically on the Strategic Executive Information System (STEIS) and for this requirement to form part of the contract between NHS SR CCG and the commissioned service. NHS SR CCG also has a duty to comply with NHS England Serious Incidents Framework March 2015. It is the responsibility of the Serious Incident Team on behalf of the CCG, to ensure this process is executed. The CCG will remain accountable for ensuring there is a robust process and the commissioned service are accountable for delivering in line with the Serious Incidents Framework 2015.

# 8 IMPLEMENTATION

## 8.1 SERIOUS INCIDENTS

### 8.1.1 Culture

NHS SR CCG is actively engaged in promoting and developing a safety culture where staff have a constant and active awareness of the potential for things to go wrong both internally and with commissioned providers. Through the development of this culture, NHS SR CCG is able to acknowledge mistakes, learn from them and take action to put things right with the opportunity to learn from the SI and improve patient safety.

Having a safety culture encourages a working environment where many components are taken into account and recognised as contributing to an SI or to the events leading up to it. It is recognised that the causes of any SI frequently extend far beyond the actions of the individual staff involved, and are often out of their control. While human error might immediately precede an SI, in a technically and socially complex system like healthcare, there are usually entrenched systemic factors at work. NHS SR CCG is committed to using root cause analysis, during the investigation of SIs and requires providers to use this technique when investigating SIs.

### 8.1.2 Duty of Candour – Being Open

A commitment to improving communication between NHS SR CCG and patients who have been harmed is integral to NHS SR CCG's strategy to improve patient safety. This demonstrates the value NHS SR CCG places on honesty combined with recognition of user contribution and involvement in the investigation process to improve patient safety. This is a national contractual requirement for all providers of NHS services under the NHS standard contract, as well as one of the fundamental standards applied by the Care Quality Commission (2015).

NHS SR CCG expects all providers to demonstrate a Duty of Candour, based on recommendations made by Francis (2013) and contained in mandate by the CQC (2015) and in line with principle of "Being Open" which involve acknowledging, apologising and explaining what happened to patients and/or their carers who have been involved in a patient safety incident, whether or not the patient or their representative have asked for this information. Following a verbal apology a written apology should follow with clear arrangements for ongoing involvement and communication.

### 8.1.3 What is a Serious Incident (SI)

Serious Incidents in the NHS include:

- Acts and/or omissions occurring as part of NHS-funded healthcare (including in the community) that result in:
- Unexpected or avoidable death8 of one or more people. This includes
- suicide/self-inflicted death; and
- homicide by a person in receipt of mental health care within the recent past
- Unexpected or avoidable injury to one or more people that has resulted in serious harm

- Unexpected or avoidable injury to one or more people that requires further treatment by a healthcare professional in order to prevent:—
- the death of the service user, or serious harm
- Actual or alleged abuse; sexual abuse, physical or psychological ill-treatment, or
- acts of omission which constitute neglect, exploitation, financial or material abuse, discriminative and organisational abuse, self-neglect, domestic abuse, human trafficking and modern day slavery where: Healthcare did not take appropriate action/intervention to safeguard against such abuse occurring, or where abuse occurred during the provision of NHS-funded care.

This includes abuse that resulted in (or was identified through) a Serious Case Review (SCR), Safeguarding Adult Review (SAR), Safeguarding Adult Enquiry or other externally-led investigation, where delivery of NHS funded care caused/contributed towards the incident.

**An incident** (or series of incidents) that prevents, or threatens to prevent, an organisation's ability to continue to deliver an acceptable quality of healthcare services, including (but not limited to) the following:

- Failures in the security, integrity, accuracy or availability of information often described as data loss and/or information governance related issues
- Property damage:
- Security breach/concern
- Incidents in population-wide healthcare activities like screening13 and immunisation programmes where the potential for harm may extend to a large population
- Inappropriate enforcement/care under the Mental Health Act (1983) and the Mental Capacity Act (2005) including Mental Capacity Act, Deprivation of Liberty Safeguards (MCA DOLS)
- Systematic failure to provide an acceptable standard of safe care (this may include incidents, or series of incidents, which necessitate ward/ unit closure or suspension of services)
- Activation of Major Incident Plan (by provider, commissioner or relevant agency)
- Major loss of confidence in the service, including prolonged adverse media coverage or public concern about the quality of healthcare or an organisation

**Never Events** are serious incidents that are wholly preventable as guidance or safety recommendations that provide strong systemic protective barriers are available at a national level and should have been implemented by all healthcare providers. Each Never Event type has the potential to cause serious patient harm or death. However, serious harm or death is not required to have happened as a result of a specific incident occurrence for that incident to be categorised as a Never Event. If a Never Event does occur it must be reported immediately as a serious incident. See Appendix 1 for Never Event List

**Near Misses**

A 'near miss' should be classified as a serious incident based on an assessment of risk that considers:

- The likelihood of the incident occurring again if current systems/process remain
- unchanged, and
- The potential for harm to staff, patients, and the organisation should the incident occur again.

This does not mean that every 'near miss' should be reported as a serious incident but, where there is a significant existing risk of system failure and serious harm, the serious incident process should be used to understand and mitigate that risk.

**Information Governance SIs** i.e. loss of data; patient or staff personal details should be reported in line with the Health and Social Care Information Centre: Checklist Guidance for Reporting, Managing and Investigating Information Governance and Cyber Security Serious Incidents (2015) . All incidents rated as1-5 on the Information Governance Risk Assessment tool must be categorised as SIs and reported as per this policy.

#### 8.1.4 Reporting a Serious Incident

**Who should report SIs?**

All commissioned providers are required to report SIs to NHS SR CCG using the STEIS system. The reporting process for commissioned providers can be found at Appendix 2.

Providers are required to demonstrate an internal governance process which ensures Serious Incidents are reported on STEIS within 2 working days of the SI being identified from within the organisation or to the organisation by an external organisation.

For SI's which are declared by the NHS SR CCG itself, these are reported directly on STEIS by the Serious Incident Team.

NHS SR CCG designated personnel are automatically informed via e-mail of an SI when a STEIS record is completed by a provider organisation. This e-mail contains a link to securely log into STEIS to view the incident details. The CCG can request a 72 hour report if additional information or assurance is required prior to completion of the SI report

#### 8.1.5 Investigation of a Serious Incident

The Lead with responsibility for serious incidents in the relevant commissioned provider services or in the CCG will:

- Ensure the establishment and co-ordination of an investigation team to thoroughly investigate the SI and to ensure objectivity using Root Cause Analysis (RCA) tools.
- Ensure Being Open and Duty of candour requirements have been adhered to
- The investigation team will be led by a nominated manager fully trained in incident investigation and analysis and sufficiently removed from the incident itself so as to be able to conduct an objective investigation. All staff involved in the incident will be asked to participate in the investigation.

- The Investigation team will support organisational learning through root cause analysis and will:
- Ensure the incident is logged on the national reporting system (STEIS)
- The SI must be logged on STEIS within 2 working days.
- Establish a set of Terms of Reference for the investigation
- Ensure that all proper records are obtained and kept secure, including the copying of Medical Records prior to their leaving the site of the incident
- Ensure there is adequate support to staff affected by the SI
- Ensure that there is a thorough investigation of serious or repeated incidents so that causation factors (root causes) can be identified
- Complete investigations and the investigation report so that it can be reviewed by the SI panel within 60 days of the incident date
- Submit the SI summary, investigation report including root causes and lessons learnt to the relevant committees in line with the investigation terms of reference
- Identify which committee or team is responsible for providing an update on actions taken following the SI investigation
- Update the STEIS system as appropriate
- Identify how lessons will be shared within the team, directorate/service and organisation

The Serious Incident team will:

- Monitor that SIs are logged onto the STEIS system appropriately
- Acknowledge receipt of SIs received via the STEIS system to providers within two working days, confirmation of the patient's/clients GP details and a deadline for receipt of the investigation report and action plan
- Request 72 hour additional information reports from providers if requested
- Maintain up-to-date electronic records of all Serious Incidents pertaining to the NHS SR CCG and commissioned services
- Provide specialist advice to support the SI process
- Ensure or advise that SIs are reported to the relevant professional bodies
- Negotiate requests for extensions of investigation reports with providers
- Forward SI reports to NHS SR CCG Quality Lead Nurses for clinical review
- Organise the SI panel meetings
- Organise the CCG SI review meetings with the commissioned providers

- Ensure feedback is provided to the commissioned providers following review of investigation reports
- Produce quarterly SI data for both NHS SR CCG and NHS England

The SI panel

All SI investigation reports are reviewed and discussed at the SI panel review meeting. The SI panel is a collaborative group drawn from CCG Quality Leads from HaRD, VoY, SR & ERYCCG and the Designated Nurse for Safeguarding Adults. The Designated Nurse for Safeguarding Children will attend as appropriate to review any case relating to safeguarding children.

The SI panel meeting will be held monthly and

- Will take place no less than two weeks prior to the CCG SI review meeting with the commissioned provider.
- The Head of Quality Assurance, VoY CCG will chair the meeting, with each CCG being responsible for leading discussions and decisions on cases that involve their patients.
- The panel members will review all the provider investigation reports prior to the meeting in line with the requirements of the NHSE SI Framework 2015 to ensure:
    - an appropriate investigation has been completed utilising recognised root cause analysis methodology
    - that Duty of Candour obligations have been fulfilled
    - all pertinent issues have been identified and considered within the report
    - that relevant actions are included in an action plan which identifies SMART actions.
    - Any requests for additional information, revised reports or action plans will be discussed at the panel meeting and the agreed outcomes will be recorded and communicated to providers at least two weeks prior to the CCG SI review meeting with the commissioned provider.

- Serious incidents will be closed on STEIS directly by the Serious Incident Team following the CCG SI review meeting with commissioned providers if the final report is deemed to demonstrate a thorough investigation in accordance with root cause analysis principles and contains a robust action plan to reduce the risk of a similar incident from happening again. Some cases at the CCGs discretion may remain open until actions are complete and assurance of this obtained by mutually agreed means.

  In order to ensure the CCG is assured of completion of actions and embedding of learning identified in the action plan the Assurance Framework Schedule, agreed with providers will take place.

| Assurance Method | Frequency | Data | Lead |
|---|---|---|---|
| Monitoring of recurrent incidents and appropriate action as required on situational basis | Ongoing | STEIS reports<br>SI reports<br>Other intelligence | SI team<br>CCG Quality team- Associate Director of Nursing, Quality and Performance Improvement |
| Robust quality review of completed investigations and action plans | Monthly | SI reports | SI team<br>Clinical reviewers<br>Associate Director of Nursing, Quality and Performance Improvement |
| Scheduled planned Quality Site visits | As per agreed schedule | SI data from area<br>Actions from SI action plans for area<br>Patient relations intelligence<br>Recurrent applicable themes | Associate Director of Nursing, Quality and Performance Improvement |
| CCG attendance at Trust SI panels | As invited | SI report<br>Analysis of recurring trends and themes | Associate Director of Nursing, Quality and Performance Improvement |
| Assurance visits to Trust | Quarterly | Random number of SI's selected and audit of evidence of completion progress provided, eg ward visits, guideline updates, safety briefs | Associate Director of Nursing, Quality and Performance Improvement |
| CCG attendance at Falls and Pressure Ulcer panels | Monthly | Collation of themes and trends | Associate Director of Nursing, Quality and Performance Improvement |

The flowchart for the SI panel review process can be found at Appendix 2

Work in conjunction with the CCG Communications service where a media response is required

The sharing of lessons learnt post-investigation is a critical part of serious incident management. Following a review of the SI, the Lead will ensure that procedures are adopted or altered to reflect the lessons learnt from Serious Incidents. The Lead Director and Investigation Officer will ensure that such procedures are disseminated to all departments through the appropriate means e.g. local networks, through team meetings, inclusion in appropriate newsletters, all in anonymised form. Lessons will be shared across organisational boundaries through local networks NHSE and Public Health England.

If as a result of the initial enquiry disciplinary action is considered necessary, advice will be sought from the Director of Human Resources or equivalent

Investigation of Serious Incidents reported within the NHS SR CCG will be reviewed by the Chief Nurse, Associate Director of Nursing, Quality and Performance Improvement and any other Officer with an associated interest in the SI. The reports will then be discussed at the collaborative SI panel review meeting and the action plan monitored by the Quality and Performance Committee.

The Associate Director of Nursing who is the Lead for Serious Incidents with NHS SR CCG will have a duty to report regularly to the SR CCG Quality and Performance committee and will escalate matters to the wider membership and Governing Body as appropriate.

#### 8.1.6 Never Events

Never Events are serious incidents that are wholly preventable as guidance or safety recommendations that provide strong systemic protective barriers are available at a national level and should have been implemented by all healthcare providers. Each Never Event type has the potential to cause serious patient harm or death. However, serious harm or death is not required to have happened as a result of a specific incident occurrence for that incident to be categorised as a Never Event.

Local reporting and management processes will underpin the implementation of the Never Events Policy. This will provide the impetus to increase patient safety through greater transparency and accountability when serious patient safety incidents occur and will inform new ways in which local commissioners can act as a lever for safer care.

Provider reporting of Never Events to NHS SR CCG forms part of existing contract arrangements for reporting of SIs.

The NHS England Framework supports NHS SR CCG in their performance management of Never Events and will provide interventions with providers where appropriate.

### 8.1.7 The role of NHS England

NHS England has a direct commissioning role as well as a role in leading and enabling the commissioning system.
As part of the latter role, NHS England maintains oversight and surveillance of serious incident management within NHS funded care and assures that CCGs have systems in place to appropriately manage serious incidents in the care they commission. They are responsible for reviewing trends, analysing quality and identifying issues of concern. They have a responsibility for providing the wider system with intelligence gained through their role as direct commissioners and leaders of the commissioning system. NHS England must maintain mechanisms to support this function, including exploiting opportunities provided by their involvement and participation in local and regional Quality Surveillance Groups.

In certain circumstances (for example with many incidents relating to mental health homicide) NHS England may be required to lead a local, regional or national response (including the commissioning of an independent incident investigation) depending on the circumstances of the case.

- NHS England is automatically alerted when an SI is reported via the STEIS system. In some circumstances NHS England may require immediate assurance depending on the seriousness and complexity of the SI.

- In exceptional circumstances, NHS England may alert other Trusts in Yorkshire and the Humber or throughout the country. NHS England will also lead on informing relevant networks if there are serious concerns about the actions of an individual health professional and s/he is considered likely to be seeking work with other employers who would be unaware of the concerns.

- Out of hours, the provider should contact NHS England on-call manager if the SI is of an exceptional nature, for example, requiring immediate investigation by the Police/HSE and/or likely to attract media attention, e.g. a fire on NHS premises causing major service disruption. The SI should be formally reported on STEIS the next working day.

- Where an SI involves more than one NHS organisation (e.g. a patient affected by system failures both in an acute hospital and in primary care), a decision should be made jointly by the organisations concerned about where the frequency/severity of the problem(s) appears to have been greatest, if necessary referring to NHS SR CCG and the Serious Incident Team or NHS England for advice. A single investigation report and action plan will be submitted by the reporting organisation.

- In the interest of patient safety, NHS England as well as NHS SR CCG will inform the CQC of “highly significant” SIs such as those which are likely to generate significant interest and possibly require consideration by the Care Quality Commission Investigations Department as indicative of system failure and are subject to national or a high level of local media interest. Where NHS England decides to notify the CQC of such an incident the relevant organisation will be informed of this first.

NHS England will continue to performance manage SIs involving the safeguarding of children as outlined in Safeguarding Vulnerable People in the Reformed NHS Accountability and Assurance Framework (March 2015). This will be done through the Safeguarding Team Designated Nurses who are employed across the four CCGs in North Yorkshire. The employing organisation is SR CCG with responsibility to the relevant organisation SR CCG, HRW CCG, HaRD CCG and VoY CCG, dependent on the residency of the individual and these cases will be kept open until the action plans have been fully implemented.

Learning from SIs within the region will also be shared nationally by NHS England as appropriate and NHS England will ensure that the learning from key inquiries at national level is implemented within North Yorkshire and the Humber.

### 8.1.8 Safeguarding Adults and Children

The new Safeguarding Vulnerable People in the Reformed NHS: Accountability and Assurance Framework published on 21 March 2015 makes clear that regardless of the individual circumstances, both commissioner and provider organisations should:

- Ensure that the Local Safeguarding Adult boards (LSABs) and Local Safeguarding Children Boards (LSCBs) have been notified of relevant incidents and agree arrangements for the management of Serious Case Reviews / Lessons Learnt Reviews, Domestic Homicide Reviews and other non-statutory reviews, depending on circumstances; including action planning and learning from incidents. All actions should be consistent with the local multi-agency safeguarding protocol and policies
- Ensure robust communication between safeguarding boards, commissioners, regulators and providers. There should not be duplication of investigations and action planning within the health care provider organisations where external bodies, such as safeguarding boards, are carrying out these activities and health care organisations are assured that actions are satisfactorily in hand and that there are robust process for ensuring any outcomes from the external investigation will be communicated and acted upon; SIs must be reported on STEIS to ensure health element of SI is reported and evidence of action implementation is submitted to commissioner
- Ensure understanding of, and apply, reporting and liaison requirements with regard to agencies such as the Police, Public Health England, Health and Safety Executive (HSE), Coroner, Education Partners, Local Authority partners, Regional Maternity Team or Medicines and Healthcare products Regulatory Agency (MHRA)
- Ensure incidents are reported to the appropriate regulatory and healthcare bodies, including the CQC and, for patient safety incidents, the National Reporting and Learning System
- Ensure that all SIs are considered by the provider in relation to whether there has been a possible incident of abuse as defined by the “Care Act (2014) and an alert is raised as appropriate.

**Children**

Under the statutory guidance Working Together to Safeguard Children: A guide to inter-agency working to safeguard and promote the welfare of children published March 2015, NHS England has a statutory duty to safeguard and promote the welfare of children. It will also be accountable for the services it directly commissions.

NHS England will also lead and define improvements in safeguarding practice and impact/outcomes, and should also ensure that there are effective mechanisms for LSCBs and Health and Wellbeing Boards to raise concerns about the engagement and leadership of the local NHS in relation to safeguarding children and adults.

For clarity, incidents relating to safeguarding children should be reported if they fall within the criteria set below:

(a) abuse or neglect of a child is known or suspected; and

(b) either — (i) the child has died; or (ii) the child has been seriously harmed and there is cause for concern as to the way in which the authority, their Board partners or other relevant persons have worked together to safeguard the child. ('Working Together' 2015)

If a case progresses to a Serious Case Review, then it should also have been reported as an SI. Cases may also be reported to NHS E as specific safeguarding children SIs.

Chapter 4 of the Guidance (HM Government 2015) also directs that reviews should also be considered where the threshold for a SCR is not reached but where there may be valuable lessons in terms of interagency or single agency working. In this case a Learning Lesson Reviews or Single Agency Review may be commissioned. Should these reviews identify any significant learning for Health organisations consideration should be given as to if the criteria for a SI reporting is reached. If not already involved, the Designated Professionals must be consulted in order to provide expertise into the decision making process

Should CCG staff identify any other case where there may be an associated safeguarding children issue they should consult with the Designated Professionals for expert advice regarding if this fits the criteria for a safeguarding children SI.

NHS England is responsible for ensuring that the health commissioning system as a whole is working effectively to safeguard and promote the welfare of children. It is also accountable for the services it directly commissions, including health care services in the under-18 secure estate and in police custody.

NHS England also leads and defines improvement in safeguarding practice and outcomes and should also ensure that there are effective mechanisms for LSCBs and health and wellbeing boards to raise concerns about the engagement and leadership of the local NHS.

**Adults**

The Care Act defines adult safeguarding as protecting a person's right to live in safety, free from abuse and neglect. The Care Act requires that each local authority must: make enquiries, or ensure others do so (e.g. health providers or police) if it believes an adult (with care and support needs, regardless of whether those needs are being met) is, or is at risk of, abuse or neglect.

An alert should be raised and an enquiry undertaken to establish whether any action needs to be taken to stop or prevent abuse and neglect, and if so, by whom;

NHS SR CCG as the commissioner of local health services is responsible for safeguarding quality assurance through contractual arrangements with all provider organisations. NHS SR CCG has the responsibility for Adults with care and support needs and is represented at the North Yorkshire Safeguarding Adults Board by The Designated Nurse for Safeguarding Adults and the Associate Director of Nursing SR CCG.

The Designated Professionals for Adults and for Children are hosted by NHS SR CCG on behalf NHS SR CCG, NHS VoY CCG, NHS HRW CCG, and NHS HaRD CCG. These professionals provide the CCGs with professional support and advice in relation to relevant SI's.

The administrative records of SIs linked with safeguarding investigations will be processed through the NHS SR CCG SI management process via the Serious Incident Team and these cases will be kept open until the action plans have been fully implemented.

Criteria for Safeguarding Adult Reviews (Care Act 2014)

(1) A SAB must arrange for there to be a review of a case involving an adult in its area with needs for care and support (whether or not the local authority has been meeting any of those needs) if:-

(a) There is reasonable cause for concern about how the SAB, members of it or other persons with relevant functions worked together to safeguard the adult, and

(b) Condition 1 or 2 is met.

(2) Condition 1 is met if:

- The adult has died, and
- The SAB knows or suspects that the death resulted from abuse or neglect (whether or not it knew about or suspected the abuse or neglect before the adult died).

(3) Condition 2 is met if:

- The adult is still alive, and
- The SAB knows or suspects that the adult has experienced serious abuse or neglect.

(4) A SAB may arrange for there to be a review of any other case involving an adult in its area with needs for care and support (whether or not the local authority has been meeting any of those needs).

(5) Each member of the SAB must co-operate in and contribute to the carrying out of a review under this section with a view to:

- identifying the lessons to be learnt from the adult's case, and
- applying those lessons to future cases.

The application for consideration of a Safeguarding Adult Review will be made to the Independent Chair of the relevant Safeguarding Adult Board.

### 8.1.9 Use of Adult Psychiatric Wards for Children Under 16

Any incident involving children under 16 who are admitted to adult mental health beds requires reporting on STEIS by the commissioning organisation. A category called 'Admission of under 16s to Acute Mental Health Ward' has been added to STEIS and requires details of how the child will be moved to appropriate accommodation within 48 hours. The definitive date is the child's date of birth.

#### 8.1.10 Incidents Involving National Screening Programmes

SIs linked to screening programmes should also be reported to NHS England within two working days. For the most serious of incidents NHS England should be informed immediately and a member of the Public Health team should be involved in the incident investigation.

#### 8.1.11 Breaches of Confidentiality Involving Person Identifiable Data (PID),

#### Including Data Loss

Any incident involving the actual or potential loss of personal information that could lead to identity fraud or have other significant impact on individuals should be considered as serious and be reported as an SI. NHS England has a role in notifying the Department of Health (DH) of certain data loss incidents, depending on the severity and in line with recommendations of Caldicott Review (2013)

Information Governance SIs should be reported in line with the Health and Social Care Information Centre: Checklist Guidance for Reporting, Managing and Investigating Information Governance and Cyber Security Serious Incidents (2015_. All incidents raised as 1-5 on the Information Governance Risk Assessment tool must be categorised as SIs and reported as per this policy. Data Protection Legislation requires incidents classified as level 2 or above must be reported to the Information Commissioners Office and HSCIC within 72 hours of identification via the IG Toolkit Reporting Tool. Consideration must also be given to incidents classified as level 1 to be reported to the Information Commissioners Office, this will be affected by the level of harm or distress it may cause to the individual whose information has been compromised.

Incidents in relation to patient information must be agreed with the CCG’s Caldicott Guardian

Incidents in relation to other individual’s information and cyber incidents must be agreed with the Senior Information Risk Owner

All staff must follow the CCG’S Information Governance incident reporting procedure

#### 8.1.12 Process for Reporting SIs that Fall into Category of Pressure Damage

Patients who are in receipt of NHS commissioned care, in hospital and community settings who experience pressure damage, should be assessed appropriately using nationally recognised assessment and care management tools. Patients should be initially and appropriately assessed within 6 hours of admission or at their first planned visit within the community setting (EPUAP,2015 Nice Standard Quality Q589). Where pressure damage occurs and the assessment identifies that there have been any acts or omissions in care contributing to the development of the pressure damage, any neglect of the patient or any safeguarding alerts the incident must be reported as a Serious Incident in line with SI Framework (2015).
Provider organisations who do not have STEIS log on, can report the SI to NYYCCGs.SeriousIncidents@nhs.net

A report will be uploaded on behalf of the organisation, and guidance given by the Serious Incident Team.

### 8.1.13 Process for Reporting SIs that Fall into Category of Health Care Associated Infections (HCAI)

It is required that MRSA and C.difficile deaths will be subject to a Post Infection Review (PIR, April 2013). These cases will be managed elsewhere and do not require to be reported as SIs.

Incidents where a HCAI is on Part 1 of death certificate should be reported as a SI.

Other HCAI which should be considered for reporting as a SI include:

- Clusters or recurrences of HCAIs which are not being managed via PIR or other HCAI process.
- Unusual outbreaks in care settings
- Incidents which result in adverse media interest.

Services will ensure engagement with NHS England Public Health teams where appropriate and for all outbreaks in non-NHS care settings.

### 8.1.14 Incidents Relating to Health and Safety, Medicines Management and Drug Errors, Equipment Failure and Waste

For incidents related to health and safety, the NHS SR CCG approved Health and Safety Specialists will advise whether it is necessary to inform the Health and Safety Executive (HSE) and whether the area involved needs to be isolated until an HSE Inspector has visited.

Any SI involving a drug error must include the name of the drug and the details of the error when reported on STEIS.

For SIs involving defective 'products' (i.e. drugs, equipment, etc), the item(s) must be isolated and retained (where this has not already occurred for the purposes of a police investigation) and the relevant staff should be contacted, Medication and Drug related errors which result in serious harm or death, or are considered “near misses” should be reported as SIs by the provider. NHS SR CCG has a duty to report defects in medicinal products, buildings and plant, and other medical and non-medical equipment and supplies to the relevant external authorities, currently the Medicines and Healthcare Products Regulatory Agency (MHRA) and/or the Health and Safety Executive.

For SIs relating to waste the appointed team for waste at the Local Authority should be involved in all investigations following accident or incident that requires reference to waste legislation. Contact with the relevant team at the Local Authority must be made through the Facilities department.

### 8.1.15 Midwifery Service Incidents

Where NHS SR CCG is performance managing a midwifery SI, it is responsible for obtaining clinical advice if required either from a supervisor of midwives independent of the service in question or directly from the Regional Maternity Team.

#### 8.1.16 Patients in Receipt of Mental Health Services

For SIs reported involving patient/s in receipt of mental health services the details of the section of the Mental Health Act the patient is under (if applicable) should be included on STEIS along with confirmation if the patient is a formal or informal patient.

#### 8.1.17 Patients in Receipt of Substance Misuse Services

In NHS commissioned services, where the cause of death of a substance misuse service user is a direct result of their substance misuse, the reporting organisation should report this as an unexpected death on STEIS.

Where patients are in receipt of care commissioning by non-NHS commissioners, such as Local Authority commissioned Drug and Alcohol Services, these are not required to be reported on STEIS, but managed through that commissioning organisations processes.

#### 8.1.18 Sharing Lessons Learned

NHS SR CCG will work in partnership with, and support provider and co-commissioning organisations to share transferable lessons learnt from serious incidents. This will enable a wider impact when implementing actions to improve the quality and safety of services provided both locally and nationally. Provider organisations will be expected to lead and implement changes to improve patient safety in line with recommendations of Francis (2013) and NHS CB (2012) Compassion in Practice (2012), provide evidence of impact on lessons learnt and quality improvement with staff. NHS SR CCG will also work with NHS England in order that learning from serious incidents is shared with other NHS organisations in Yorkshire and the Humber and nationally where appropriate.

### 8.2 INCIDENT MANAGEMENT AND RAISING CONCERNS

#### 8.2.1 Reporting Incidents

An incident occurring in NHS SR CCG is any event or circumstance that could or did lead to unintended or unexpected harm, loss or damage to one or more patients, members of staff, visitors, other persons or property.

Incidents should be reported using the Incident Reporting system as soon as possible following the incident and within 2 working days. The reporter should also notify their line manager of incident at same time.

An investigation will be required by the line manager or appropriate other. The level of the investigation will depend upon the grade of the incident.

The investigation into the incident must be completed within the standard timescales for responding to an SI.

The Communications service will initiate a communication media handling strategy for responding incidents which have the potential to attract multiple enquires from the public, once instructed by the Associate Director of Nursing, S&R CCG .

### 8.2.2 Concerns

In line with recommendations (Francis 2013), to promote an open learning culture, NHS SR CCG recognises the value of concerns being reported. An individual concern in itself may not constitute an incident for investigation, but collectively, can contribute towards a body of evidence to enable the CCG to investigate where a number of similar concerns are reported. Concerns can relate to local NHS services or care homes. Concerns raised may be something any individual has witnessed or may be third party information, which is regarded as needing to be noted.

No patient or person identifiable information should be reported in a concern report. Concerns reported will be reviewed by an appropriate officer in NHS SR CCG or a nominated delegate, to identify themes requiring further investigation.

Concerns should be raised through the incidents reporting system or through the patient relations service at SCRCCG.PatientRelations@nhs.net or phone 0800 068 8000.

## 9 TRAINING & AWARENESS

Staff will be made aware of the policy through the staff induction process, when directed to review policies and procedures of the organisation. The policy will be held on the Intranet.

Staff involved with the monitoring, management and review of Serious Incidents, Incidents and Concerns will receive Root Cause Analysis training using nationally approved tools.

## 10 MONITORING & AUDIT

A monthly review of all Serious Incidents will be held. This review will be a collaborative approach including NHS SR CCG, NHS HaRD CCG, NHS VoY CCG and NHS ERY CCG.

## 11 POLICY REVIEW

This policy will be reviewed every two years. Earlier review may be required in response to exceptional circumstances, organisational change or relevant changes in legislation/guidance and as instructed by the senior manager responsible for this policy.

## 13 Associated Documentation

Information Governance Incident Reporting Procedure

## APPENDICES

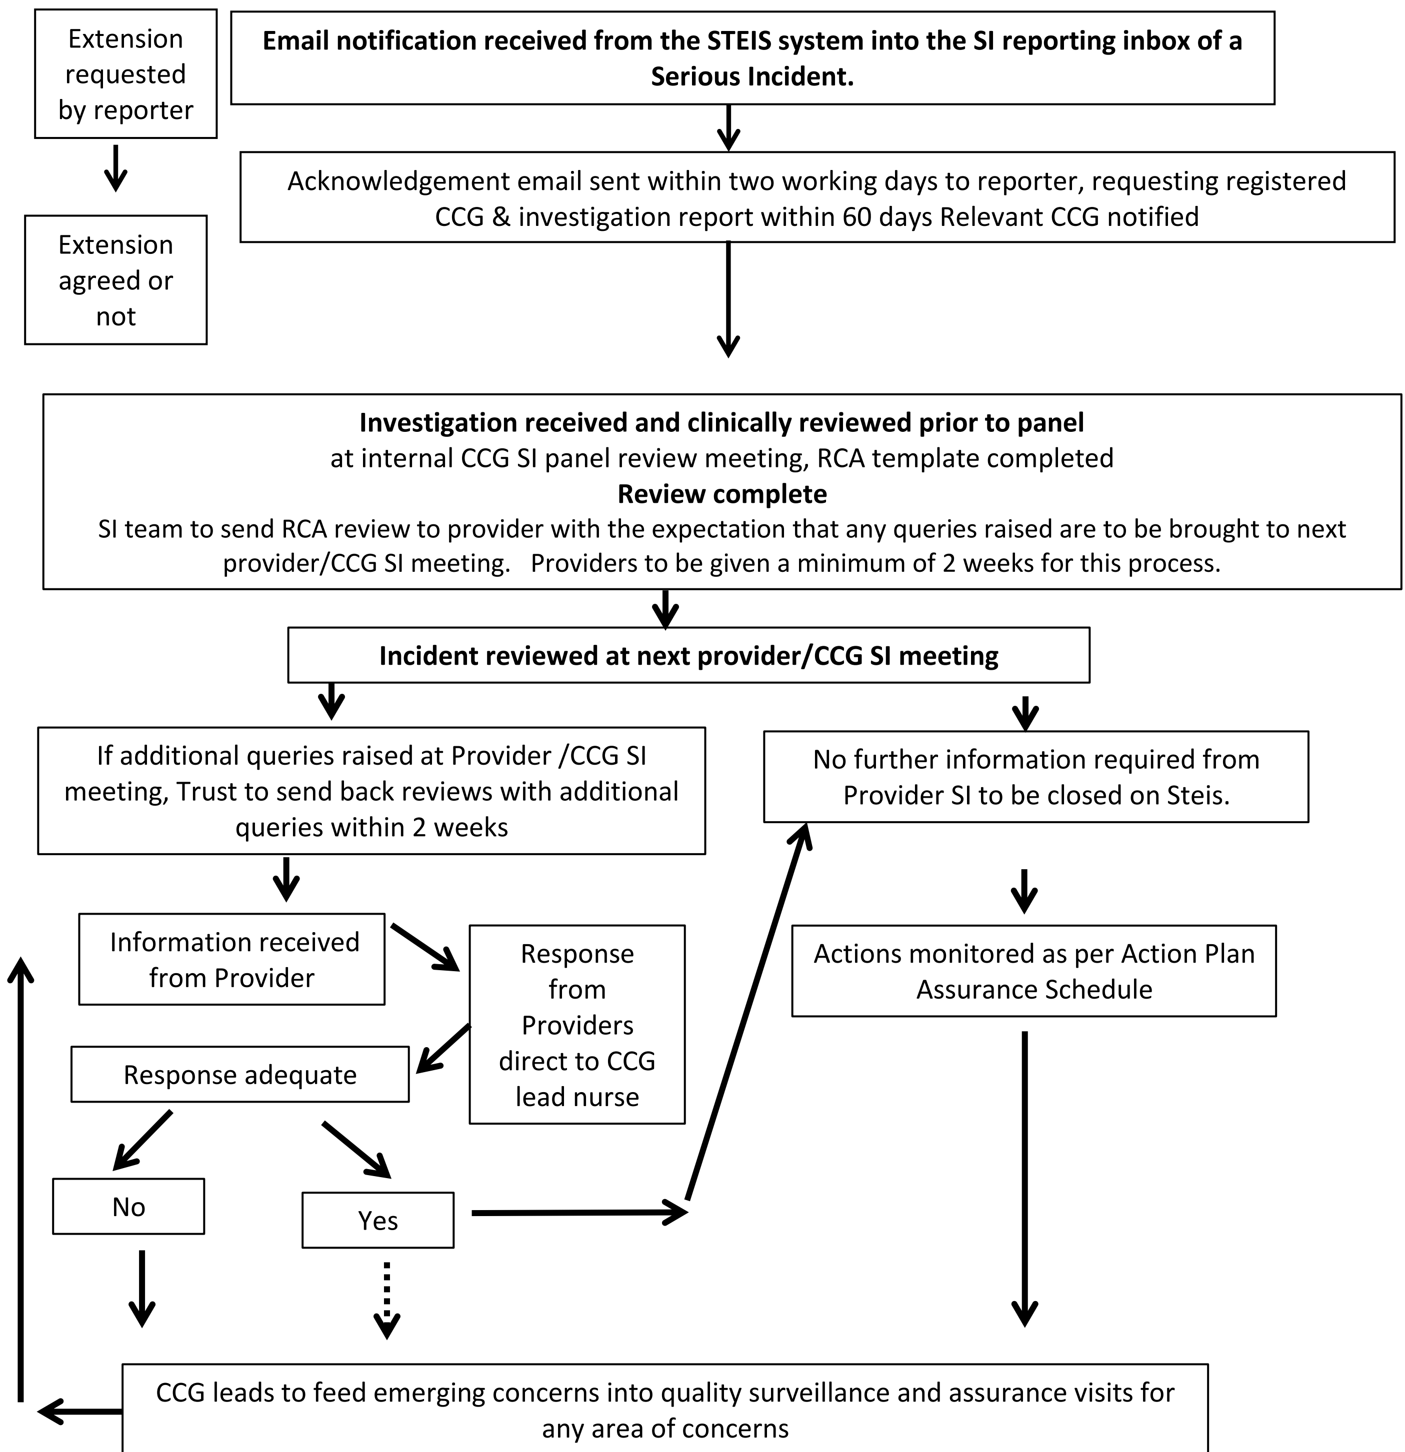
### Appendix 1 - Core list of Never Events

1. Wrong site surgery
2. Wrong implant/prosthesis
3. Retained foreign object post-procedure
4. Mis – selection of a strong potassium containing solution
5. Wrong route administration of medication
6. Overdose of Insulin due to abbreviations or incorrect device
7. Overdose of methotrexate for non-cancer treatment
8. Mis – selection of high strength midazolam during conscious sedation
9. Failure to install functional collapsible shower or curtain rails
10. Falls from poorly restricted windows
11. Chest or neck entrapment in bedrails
12. Transfusion or transplantation of ABO-incompatible blood components or organs
13. Misplaced naso- or oro-gastric tubes
14. Scalding of patients
15. Unintentional connection of a patient requiring oxygen to an air flowmeter

**Appendix 2**

**Commissioned Services Reporting Process**

****all communication to be sent via SI reporting e-mail address: nyyccgs.seriousincidents@nhs.net**



NYY area SI panel process for Providers V6

**Appendix 3**

**Serious Incident Report Submission – Extension Requests**

Provider organisations are required to report Serious Incidents (SI) within two working days, once identified. As per Framework for SIs (March 2015) the date of SI's discovery by the organisation is the date from which the deadline is taken for a report into SI to be completed and submitted. Organisations are requested to use "Strategic Executive Information System (STEIS) to log SIs, and are required to keep commissioners informed as per contractual arrangements.

SIs should be fully investigated by the provider using nationally recognised tools and a report with action plan signed off by a director, submitted to the commissioner within12 weeks, from the date of organisation's awareness of the SI.

It is expected that SI reports will be submitted within the 12 week timeframe. When the provider recognises they may need to ask for an extension to a known deadline date, requests MUST BE formally requested via the SI Inbox. It is expected the provider will make request for extension deadline well ahead of the due date. Repeated extension requests made within last 4 weeks of the due date for the report will be challenged by the commissioner.

It is acknowledged that on occasion, some SIs investigations cannot be completed within 12 weeks. An interim report will always be required to be submitted at the initial 12 week deadline. The provider must request an extension for the final report submission.

Coroner/inquest investigations often benefit from completed SI Investigations and Coroners will often await SI investigation reports. On occasion the SI investigation completion may be held up by the Coroner/inquest investigation. In these circumstances, an interim SI report will be required in the initial 12 week deadline.

All extension requests MUST BE formally requested via the SI Inbox. The extension requested should be a realistic timeframe, to avoid the potential for repeated requests for extensions. Extensions will be agreed on a case by case basis, and may include:

- Police investigation
- Coroner's investigation requiring completion prior to SI report completion
- Where one or more members of staff are unavailable for a prolonged period whose information is important to the SI investigation.
- Other situations on case by case basis, where the associated team with lead for Serious Incident service will liaise with relevant CCG Lead.

In all these circumstances, an interim SI report will be required in the initial 12 week deadline.

In conclusion, providers are expected to complete SI investigations and submit reports to the SI Inbox within the 12 week deadline. SIs reported, reports submitted and number of extensions requested will be monitored through the SI Panel and the contract management board.

| **Completed by** | **Liz Vickerstaff** |

| **Domain** | **Objectives** | **Impact of activity**<br>Negative = -1<br>Neutral = 0<br>Positive = 1<br>Unknown = ?<br>Not applicable = n/a | **Brief description of impact** | **If negative, how can it be mitigated?**<br>**If positive, how can it be enhanced?** |
|---|---|---|---|---|
| **Travel** | Will it provide / improve / promote alternatives to car based transport?<br>Will it support more efficient use of cars (car sharing, low emission vehicles, environmentally friendly fuels and technologies)?<br>Will it reduce 'care miles' (telecare, care closer) to home?<br>Will it promote active travel (cycling, walking)?<br>Will it improve access to opportunities and facilities for all groups? | 1 | Use of teleconference facilities for meetings | |
| **Procurement** | Will it specify social, economic and environmental outcomes to be accounted for in procurement and delivery?<br>Will it stimulate innovation among providers of services related to the delivery of the organisations' social, economic and environmental objectives?<br>Will it promote ethical purchasing of goods or services?<br>Will it promote greater efficiency of resource use?<br>Will it obtain maximum value from | 0 | | |

| | | | | |
|---|---|---|---|---|
| | pharmaceuticals and technologies (medicines management, prescribing, and supply chain)?<br>Will it support local or regional supply chains?<br>Will it promote access to local services (care closer to home)?<br>Will it make current activities more efficient or alter service delivery models | | | |
| **Facilities Management** | Will it reduce the amount of waste produced or increase the amount of waste recycled?<br>Will it reduce water consumption? | 1 | All documentation processed electronically, and meetings conducted using "e" technology. | |
| **Workforce** | Will it provide employment opportunities for local people?<br>Will it promote or support equal employment opportunities?<br>Will it promote healthy working lives (including health and safety at work, work-life/home-life balance and family friendly policies)?<br>Will it offer employment opportunities to disadvantaged groups? | 0 | | |
| **Community Engagement** | Will it promote health and sustainable development?<br>Have you sought the views of our communities in relation to the impact on sustainable development for this activity? | 0 | | |
| **Buildings** | Will it improve the resource efficiency of new or refurbished buildings (water, energy, density, use of existing buildings, designing for a longer lifespan)?<br>Will it increase safety and security in new buildings and developments?<br>Will it reduce greenhouse gas emissions from transport (choice of mode of transport, reducing need to travel)?<br>Will it provide sympathetic and appropriate landscaping around new development?<br>Will it improve access to the built environment? | 0 | | |
| **Adaptation to Climate Change** | Will it support the plan for the likely effects of climate change (e.g. identifying vulnerable groups; contingency planning for flood, heat wave and other weather extremes)? | 0 | | |

| **Models of Care** | Will it minimise 'care miles' making better use of new technologies such as telecare and telehealth, delivering care in settings closer to people's homes?<br>Will it promote prevention and self-management?<br>Will it provide evidence-based, personalised care that achieves the best possible outcomes with the resources available?<br>Will it deliver integrated care, that co-ordinate different elements of care more effectively and remove duplication and redundancy from care pathways? | 0 | | |
|---|---|---|---|---|

**Appendix 6**
**Bribery Act 2010 Guidance and Bribery Prevention Checklist**

| Areas for action | Expected Action | Evidence of Compliance/Assurance |
|---|---|---|
| 1. Governance and Top Level Commitment | The Chief Executive should make a statement in support of the anti-bribery initiative and this should be published on the organisation's website.<br><br>The board of directors should take overall responsibility for the effective design, implementation and operation of the anti-bribery initiatives. The Board should ensure that senior management is aware of and accepts the initiatives and that it is embedded in the corporate culture. | |
| 2. Due Diligence | This is a key element of good corporate governance and involves making an assessment of new business partners prior to engaging them in business. Due diligence procedures are in themselves a form of bribery risk assessment and also a means of mitigating that risk. It is recommended that at the outset of any business dealings, all new business partners should be made aware in writing of the organisation's anti-corruption and bribery policies and code of conduct. | |

| Areas for action | Expected Action | Evidence of Compliance/Assurance |
|---|---|---|
| 3. Code of conduct | The organisation should either have an anti-bribery code of conduct or a general code of conduct for staff with an anti-bribery and corruption element.<br><br>The organisation should revise the Standards of Business Conduct Policy (or equivalent) and Declaration of Interests guidance (see point 4 below) to reflect the introduction of the Bribery Act. | |
| 4. Declaration of Interests/Hospitality | The organisation should have in place a declaration of business interests/gifts and hospitality policy which clearly sets out acceptable limits and also a mechanism to monitor implementation. | |
| 5. Employee employment procedures | Employees should go through the appropriate propriety checks e.g. CRB (Criminal Records Bureau) and/or a combination of other checks before they are employed to ascertain, as far as is reasonable, that they are likely to comply with the organisation's anti-bribery policies. | |
| 6. Detection procedures | The organisation should ensure Internal Audit/Counter Fraud check projects, contracts, procurement processes and any other appropriate systems where there is a risk that acts of bribery could potentially occur. | |
| 7. Internal reporting procedures | The organisation should have internal procedures for staff to report suspicious activities including bribery. | |
| 8. Investigation of Bribery allegations | The organisation should have procedures for staff to report suspicions of bribery to NHS Protect (previously NHS Counter Fraud and Security Management Service) and the organisation's Local Counter Fraud Specialist for investigation/referral to the appropriate authorities. | |

| Areas for action | Expected Action | Evidence of Compliance/Assurance |
|---|---|---|
| 9. Risk assessment | MoJ (Ministry of Justice) guidance states"…organisations should adopt a risk-based approach to managing bribery risks…[and] an initial assessment of risk across the organisation is therefore a necessary first step". The organisation should, on a regular basis, assess the risk of bribery and corruption in its business and assess whether its procedures and controls are adequate to minimise those risks. | **"Never Event" Serious Incidents**<br>Where a patient pathway error has been identified as a Never Event, the commissioner is not required to pay for the care delivered for the episode of the patients care in relation to the Never Event.<br>Never Events are clearly described in National Framework for SIs, and trusts required to declare these on STEIS.<br>All Serious Incidents, including Never Events are reported to the Contract Management Group on a monthly basis and where necessary, funds recouped for Never Event occurrence.<br><br>**Organisational Integrity**<br>Organisations are required to declare Serious Incidents and Incidents. Organisations also investigate Serious Incidents and Incidents using internal investigators.<br><br>These requirements present a very low level of risk to the CCG. |
| 10. Record keeping | The organisation should keep reasonably detailed records of its anti-fraud and corruption initiatives, including training given, hospitality given and received and other relevant information. | |
| 11. Internal review | The organisation should carry out an annual internal review of the anti-bribery and corruption programme. | |
| 12. Independent assessment and certification | Proportionate to risks identified, the organisation should commission, at least every three years, an independent assessment and certification of its anti-bribery programme. | |

| Areas for action | Expected Action | Evidence of Compliance/Assurance |
|---|---|---|
| 13.Internal and External communications | The organisation should publicise the NHS Fraud and Corruption Reporting Line (FCRL) and on-line fraud reporting facility.<br><br>The organisation should publicise the Security Management role (theft and general security issues) and reporting arrangements.<br><br>The organisation should work with its stakeholders in the public and private sector to help reduce bribery and corruption in the health industry. | |
| 14.Awareness and training | The organisation should provide appropriate anti-bribery and corruption awareness sessions and training on a regular basis to all relevant employees. | |
| 15. Monitoring:<br>• Overall Responsibility<br>• Financial/Commercial Controls | • A senior manager should be made responsible for ensuring that the organisation has a proportionate and adequate programme of anti-fraud, corruption and bribery initiatives.<br>• The organisation should ensure that its financial controls minimise the risk of the organisation committing a corrupt act.<br>• The organisation should ensure that its commercial controls minimise the risk of the organisation committing a corrupt act. These controls would include appropriate procurement and supply chain management, and the monitoring of contract execution. | |
