| Physical Disability – Personal Care                                   | 3,198       | 1,639   |
| Visual Impairment – Serious   | 39          | 19      |
| Hearing Impairment – Some hearing loss                                | 69,328      | 3,565   |
| Hearing Impairment – Severe   | 395         | 203     |
| Mental Health Problems  | 4,331       | 2,096   |

| <b>Sexual Orientation</b>                | In relation to sexual orientation, local population data is not known with any certainty. In part, this is because until recently national and local surveys of the population and people using services did not ask about an individual's sexual orientation. However, nationally, the Government estimates that 5% of the population are lesbian, gay or bisexual communities.   |                         |  |                        |                         |             |          |      |         |        |        |  |        |     |                                    |       |                |                                   |             |      |                     |        |   |
|--|--|-------------------------|--|------------------------|-------------------------|-------------|----------|------|---------|--------|--------|--|--------|-----|------------------------------------|-------|----------------|-----------------------------------|-------------|------|---------------------|--------|---|
| <b>Gender Reassignment</b>               | There are not any official statistics nationally or regionally regarding transgender populations, however, GIRES (Gender Identity Research and Education Society - <a href="http://www.gires.org.uk">www.gires.org.uk</a> ) estimated that, in 2007, the prevalence of people who had sought medical care for gender variance was 20 per 100,000, i.e. 10,000 people, of whom 6,000 had undergone transition. 80% were assigned as boys at birth (now trans women) and 20% as girls (now trans men). However, there is good reason, based on more recent data from the individual gender identity clinics, to anticipate that the gender balance may eventually become more equal.                                       |                         |  |                        |                         |             |          |      |         |        |        |  |        |     |                                    |       |                |                                   |             |      |                     |        |   |
